Heating resistors

Thermal regulation

res_007

Fan ventilation

res_008

Natural ventilation - Class II

res_001

Natural ventilation

The solution for

> Power distribution

Strong points

> Compact design
> Long service life
> Maintenance-free
> Rapid fixing

Conformity to standards

> EN 55014
> EN 50082-1
> EN 60335-1

Function

The heating resistor is designed to maintain the enclosure temperature above the dew point.

Models

- Natural ventilation.
- Natural ventilation - Class II.
- Fan ventilation.

Range

- Heating power from 15 to 400 W.

General characteristics

- Terminal connections.

socomec Innovative Power Solutions
