

SIRCO PV UL 98B

Load break switches for photovoltaic applications
from 100 to 2000 A, up to 1500 VDC

Function

SIRCO PV UL 98B are manually operated multipolar load break switches. They make and break under load conditions and provide safety isolation for any PV circuit up to 1000 VDC (as per UL 98B standard) and 1500 VDC (as per IEC 60947-3). They comply with NEC Atr. 690 (US National Electrical Code) concerning photovoltaic installations. They are compliant for use within solar inverters and enclosures governed by standard UL1741.

Advantages

Performance

A glass fibre reinforced polyester break chamber with an arc extinguishing system provides a patented safety disconnection system offering rapid extinguishing of the electric arc up to 1500 VDC and current interruption up to 2000 A.

SIRCO PV are extremely durable switches that have been tested and approved for use in the most demanding environments.

They have been designed and tested for all types of applications: connected to earth, floating or bipolar.

Back-to-back double load break switch

The system of back-to-back double switches enables:

- on load operation of two switches with a single handle,
- compact solution when connecting two separate photovoltaic circuits compared with the use of two separate switches,
- easy connection,
- voltages above 1000 VDC are broken by the use of two poles in series.

The solution for

- > Combiner box
- > Recombiner box
- > Inverter

Strong points

- > Patented switching technology
- > Positive break indication
- > Up to 1000 VDC as per characteristics by UL 98B
- > Up to 1500 VDC as per characteristics by IEC 60947-3
- > Suitable for use in accordance with NEC Art. 690

Conformity to standards

- > UL 98B Guide WHVA, file E346418
- > CSA C22.2#4, Class 4651-02, file 112964
- > NEC Art 690 Issue 2011
- > IEC 60947-3

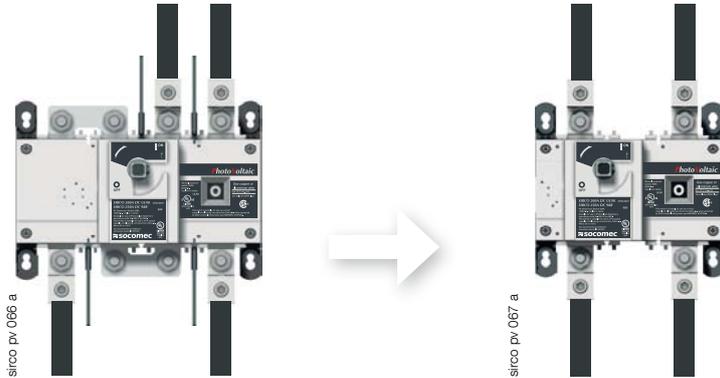

Approvals and certifications⁽¹⁾

New patented switching technology to break 500 VDC per pole

Most PV systems today are designed at 1000 VDC. Our new range of switches allows on-load breaking of 1000 VDC on just 2 poles. This innovation provides an extremely compact solution.

Classic solution
 Example of connection of a 1000 VDC disconnect.

New
 With our new range we can break 1000 VDC with 2 poles in series.

Optimise your investment

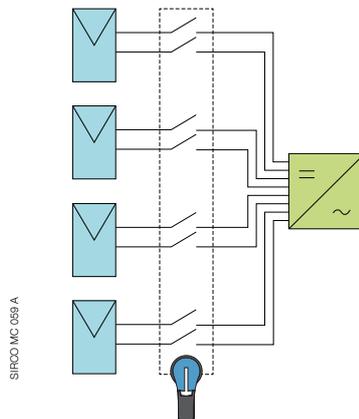

- Limit costs by reducing the number of bridging bars per device.
- Gain time by having a less number of bridging bars to install.
- Reduce the overall heat dissipation of the switch. A 2 pole SIRCO PV switch takes direct advantage of this, leading to possibility to use a smaller enclosure.

Limit potential risk

PV equipment is subject to extreme variation in temperature. Point of connection are therefore subject to potential loosening of connection due to breaking cooling effect. Limiting the number of poles greatly reduces the risk of a loose connection.

Allows to disconnect up to 4 circuits with one switch ("The Worlds first")

A compact and cost effective solution for recombinaer applications. Allows to break up to 24 circuits by respecting the NEC article 690.

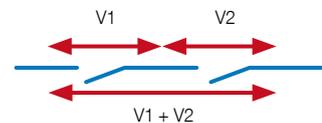

4 MPPT switches, 4 circuits are switched together.

Achieving 1500 VDC characteristics in a compact footprint

SOCOMECC's new technology enables Utilisation at 1500 VDC by connecting three poles in series.

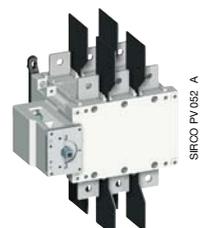

- Each pole of a switch has a maximum voltage breaking capacity. To break a high DC voltage it is necessary to connect poles in series. The global on-load breaking capacity of a switch is determined by multiplying the max voltage breaking capacity per pole by the number of poles in series.
- Paralleling the poles on our double-stack design permits a higher current rating to be achieved.

350 A 1000 VDC 4 circuits.

400 A 1500 VDC

800 A 1500 VDC with a 400 A double stack switch.

from 100 to 2000 A - up to 1500 VDC

Accessories

External operation

Use

In a combiner box, located close to the solar cell strings, or located close to the inverter, we recommend to use a door interlocked external handle for its safety features.

Door interlocked external operation handles include an escutcheon, are padlockable and must be utilized with an extension shaft.

Example

The locking function of the enclosure in the "ON" position will force the operator to safely disconnect and isolate the solar cell strings prior to any intervention. Opening the door when the switch is on "ON" position is possible by defeating the locking function using a tool (authorized persons only). The interlocking function is restored when the door is re-closed.

Characteristics

Compliance to UL 98B and IEC 60947-3 standards

SIRCO PV UL 98B switches comply with both UL 98B and IEC 60947-3 standards. As acceptance test criteria are different depending on one or the other standard, the same product can be referred to with two different ratings, identified in the characteristic table as follows:

- "Rating" for characteristics as per standard UL 98B.
- "Rated current" for characteristics as per standard IEC 60947-3.

UL 98B										
Rating (A)		100 A				200 A				
Number of circuits	Rated voltage	(A)	Number of pole(s) in series per polarity	Number of pole(s) of the device	Frame size	(A)	Number of pole(s) in series per polarity	Number of pole(s) of the device	Frame size	
1 circuit	1000 VDC	100	2 P	2 P	B4	200	2 P	2 P	B4	
2 circuits	600 VDC	100	1 P	2 P	B4	130	1 P	2 P	B4	
2 circuits	1000 VDC	100	2 P	4 P	B4 _{DS}	200	2 P	4 P	B4 _{DS}	
4 circuits	600 VDC	100	1 P	4 P	B4 _{DS}	130	1 P	4 P	B4 _{DS}	
Short-circuit capacity at 1000 VDC (any circuit breaker)										
Prospective short-circuit current (kA rms DC)		10 ⁽¹⁾				10 ⁽¹⁾				
Connection terminals										
Min. connection wire range/ AWG		#6				#6				
Max. connection wire range/ AWG		300MCM				300MCM				
Mechanical characteristics										
Durability (number of operating cycles)		10 000				10 000				
Operating effort (lbs.in/Nm)		88.5/10				88.5/10				
Auxiliary contact										
Electrical characteristics		A300				A300				
IEC 60947-3										
Rated current I_n		160 A				250 A				
Thermal current at 40°C (A)		160				250				
Thermal current at 50°C (A)		160				250				
Thermal current at 60°C (A)		160				250				
Rated insulation voltage U _i (V)		1500				1500				
Rated impulse withstand voltage U _{imp} (kV)		12				12				
Number of circuits	Rated voltage	Utilisation category	(A)	Number of pole(s) in series per polarity	Number of pole(s) of the device	Frame size	(A)	Number of pole(s) in series per polarity	Number of pole(s) of the device	Frame size
1 circuit	1000 VDC	DC-21 B	160	2 P	2 P	B4	250	2 P	2 P	B4
1 circuit	1500 VDC	DC-21 B	160	4 P	4 P	B4 _{DS}	250	4 P	4 P	B4 _{DS}
2 circuits	1000 VDC	DC-21 B	160	2 P	4 P	B4 _{DS}	250	2 P	4 P	B4 _{DS}
4 circuits	600 VDC	DC-21 B	125	1 P	4 P	B4 _{DS}	160	1 P	4 P	B4 _{DS}

(1) Without fuse during 50 ms.
